STATE OF WASHINGTON

Voters’ Pamphlet

General Election
November 7, 2006

NOTICE!
The 2007 Primary is moving from September to August 21, 2007

Your Vote is Your Voice!
Dear Voter,

I express my heartfelt thanks to elementary school student Desirae Marion whose artwork is featured on the cover of this year’s Voters’ Pamphlet, and to high school student Amanda Murphy for her articulate essay on the opposite page. Both illustrate the power of a privilege that gives each of us our voice in government.

As Washington voters, we may appreciate that power better than most. After our historic election for Governor in 2004, the top two candidates stood 46 ten-thousandths of 1 percent apart — and the extraordinary circumstances had only begun.

I commend you for responding to the trials of that election in force and calling for changes that, above all else, guarantee your voice will be protected and secure.

With your help, we have thoughtfully implemented improvements to reinforce the integrity of every election.

Starting next year, Washington will hold its Primary in August instead of September. Ballots will reach our military and overseas citizens in time to be voted and returned before Election Day. County elections departments will also have more time to prepare for the November General Election.

Washington continues to reduce the risk of voter fraud by ensuring that every person who casts a ballot is eligible to vote. With a new centralized voter registration database, we’ve cancelled 3,468 voter registration records of felons, 18,871 of the deceased, and 24,180 duplicates. In addition, voters who turn out at the polls are required to show identification.

We’ve also simplified the voting process. Most counties will now only conduct elections by mail instead of holding two elections, one by mail and a second at the polls.

Finally, the Office of the Secretary of State has authority to review every county’s election procedures before, during, and after an election.

We, as election administrators, must tirelessly strive for fair and accurate elections.

I encourage you, as a voter, to fulfill your civic duty. Engage in this democracy. Use the Voters’ Pamphlet and other resources to cast an informed vote. Find out if your county is using new voting equipment and follow the directions on your ballot carefully.

At the very least, the contested gubernatorial election two years ago ought to leave all of us with newfound respect for democracy and the power of a single vote.

Secretary of State Voter Information Hotline 1.800.448.4881
(TDD/TTY Hotline for the hearing or speech impaired 1.800.422.8683)
Visit our online Voters’ Guide at www.vote.wa.gov
The view of voting as a trivial matter has become an increasing trend among many people in our society today. In fact, less than sixty-one percent of those eligible voted in the last presidential election. This shocking trend is undoubtedly the result of a lack of understanding of the complete ideas behind and the implications of voting. As I reached the voting age, I too had fallen into these common misguided ideas regarding the value and effect of my vote, and it was not until I began to better understand voting that I was able to fully realize the blessing I have been given.

Voting has substantially wider effects than I had ever previously imagined. Our elected officials make laws that will affect our country as well as others for many years. To know that my vote has the potential to be a factor in helping people all around the world is something that I find amazing.

Additionally, unlike in other countries, our right to vote is among the inalienable rights guaranteed to us by our Constitution. Citizens of Afghanistan, for example, only just obtained this right as they voted in their first elections in years, which was secured only through much preceding violence. Knowing that, I feel tremendously grateful to have such a precious gift.

Without a full understanding of voting, many fail to recognize the great effect and power that their vote has. This right is a blessing that I believe we all should cherish.
Voting in Washington State

Voter Qualifications

To register to vote, you must be:

• A citizen of the United States
• A legal resident of Washington State
• At least 18 years old by Election Day
• If you have been convicted of a felony in Washington, another state, or in federal court, you lose your right to vote in Washington until your civil rights are restored.

In Washington State, you do not declare political party membership when you register to vote.

Registration Deadlines

While you may register to vote at any time, keep in mind that there are registration deadlines prior to each election. You must be registered at least 30 days before an election if you register by mail or through the Motor Voter program. You may register in person at the office of your county elections department up to 15 days before an election. However, you must vote by absentee ballot for that particular election. The phone number and address of your county elections department is located in the back of this pamphlet.

How to Register to Vote

Forms are available on the Internet at www.vote.wa.gov or at your county elections department, public libraries, schools, and other government offices. You may also request a form through the State Voter Information Hotline. (See Services and Additional Assistance on this page.)

Keep Your Voter Registration Up-to-Date

If your voter registration record does not contain your current name or address, you may not be able to vote. You can use the mail-in voter registration form to let your county elections department know when you move or change your name. You must re-register or transfer your registration at least 30 days before the election to be eligible to vote in your new precinct.

Absentee Ballots

Absentee ballot requests must be made to your county elections department (not the Secretary of State). No absentee ballots are issued on Election Day except to a registered voter who is a resident of a health care facility. A ballot may be requested in person, by phone, mail, electronically or by a member of your immediate family as early as 90 days before an election.

You may also apply in writing to automatically receive an absentee ballot before each election. An absentee ballot request form is on the back page of this pamphlet. If you have already requested an absentee ballot or have a permanent request for a ballot on file, please do not submit another application.

You will receive your absentee or mail-in ballot approximately 14 days prior to the election. Upon receipt, vote your ballot. Please do not attempt to vote again at your polling location. Absentee and mail-in ballots must be signed and postmarked or delivered to your county elections department on or before Election Day. In order to assist processing, return your voted ballot early.

Election Dates and Poll Hours

The General Election is November 7, 2006. Polling place hours are 7:00 a.m. to 8:00 p.m.

Services and Additional Assistance

Contact your county elections department for help with voting your ballot or finding your polling location. The phone number and address of your county elections department is located in this pamphlet.

Contact the Office of the Secretary of State for:

• Voters’ Pamphlets in other formats (Braille, audio cassette, large print) or languages (Spanish, Chinese);
• Lists of initiatives and referenda; and
• Voter registration, voting, and absentee ballot information.

This information is also available at www.vote.wa.gov or call the Voter Information Hotline, 1.800.448.4881 (TDD/TTY for the hearing- or speech-impaired only is 1.800.422.8683).

**Public Access to Campaign Spending Reports**

**Contributions to Candidates and Political Committees**

No person may make contributions to a state legislative candidate that exceeds $700 per Primary or election in which the candidate’s name is on the ballot. Contributions to state executive candidates may not exceed $1,400 in the Primary and $1,400 in the General Election. A person may give unlimited funds to the exempt activities account of a political party, to ballot issue committees, or to other political committees. During the 21 days before the General Election, however, a person may contribute no more than $5,000 to a local or judicial office candidate, political party or other political committee. Contributions from corporations, unions, businesses, associations and similar organizations are permitted, subject to limits and other restrictions.

**Registration and Reporting by Candidates and Political Committees**

No later than two weeks after an individual becomes a candidate or a political committee is organized, a campaign finance registration statement must be filed with the Public Disclosure Commission (PDC) and the county elections department. (Committees that form within three weeks of the election must register within three business days.) The candidate or committee treasurer is also required to report periodically the source and amount of campaign contributions over $25 and to list campaign expenditures. The occupation and employer of individuals giving more than $100 to a campaign must also be identified.

These reports may be inspected and copied at the PDC’s Olympia office, the county elections department in the county where the candidate lives, and on the Internet (www.pdc.wa.gov). Every candidate and political committee participating in the election must make their campaign books and records available for public inspection, by appointment, during the eight days before the election except Saturdays, Sundays and legal holidays. Use the contact information provided on the campaign registration to make an appointment.

**Independent Campaign Expenditures**

Anyone making expenditures totaling $100 or more in support of or opposition to a state or local candidate or ballot proposition (not including contributions made to a candidate or political committee) must file a report with the PDC and their county elections department within five days. Forms are available from the PDC and the county elections department, or can be downloaded from the PDC website. Finally, all political advertising must identify the person paying for the ad and may have to include other information. Expenditures for independently sponsored political advertisements that cost $1,000 or more and appear during the last three weeks before an election must be reported to the PDC within 24 hours of when the ad is first presented to the public.

**Federal Campaigns**

Contributions to U.S. Senate and House of Representative candidates are regulated by federal law. An individual may contribute a maximum of $2,000 in the Primary and $2,000 in the General Election to each candidate for U.S. Senator and U.S. Representative. Corporations and unions are prohibited from contributing from their general treasury funds to federal campaigns. Contributions may be made from separate segregated funds (also called political action committees or PACs). Copies of the federal campaign finance reports are available from the Federal Election Commission (FEC).

Helpful Information for Voters

It’s your voice. Your privilege. Your right. It is your chance to have your voice heard on matters that affect everyday life. Your help is needed to make sure your vote can be legally counted.

It’s the job of your county elections officials to keep track of voter registration records, and to count—and account for—your vote. When your voter registration record is up-to-date, it means you’re helping to make elections as accurate as possible.

BRING IDENTIFICATION TO THE POLLS.

If you are a poll voter, be sure to bring “valid photo identification, such as a driver’s license or state identification card, student identification card, or tribal identification card, a voter’s voter identification issued by a county elections officer, or a copy of a current utility bill, bank statement, paycheck, or government check or other government document. Any individual who desires to vote in person but cannot provide identification as required by this section shall be issued a provisional ballot.” (Chapter 29A.44.205, Revised Code of Washington)

MARKING YOUR BALLOT.

Carefully follow the instructions provided with your ballot. Make sure you mark your ballot clearly so that each vote will be counted correctly.

What Happens if I Vote for More than One Candidate?

In most instances, you may only vote for one candidate per office. If you vote for more than one candidate for an office, or select more than one response for a ballot measure, the votes will be considered “overvotes” and no vote will be counted for that office or ballot measure. In this case, the remainder of your ballot that is valid will be counted. In rare instances, you may vote for more than one candidate but the ballot will clearly indicate that.

How do I Correct My Ballot?

To make a correction on a ballot, you must cross out the incorrect vote and mark the correct choice. If you are unable to correct your ballot, you may request a replacement ballot.

How do I Obtain a Replacement Ballot?

If you have destroyed, spoiled, lost, or not received your original absentee or mail ballot, you may obtain a replacement ballot by contacting your county elections department.

YOUR SIGNATURE MAKES YOUR VOTE COUNT.

Make sure to sign the outer envelope of your absentee/mail ballot before you return it. The only way your ballot can legally be counted is by verifying and matching your signature to the one on your voter registration record. If your signature has changed you must update your records with your county elections department.

THE 2007 PRIMARY DATE HAS MOVED.

Mark your calendar. Starting in 2007, the date of the Primary will be the third Tuesday in August (August 21, 2007), pushed back four weeks from the third Tuesday in September. Moving the Primary date not only allows county elections officials preparing and mailing ballots more time to conduct the election but also better protects the right to vote for military and overseas citizens.

DISABILITY ACCESS UNITS.

The Office of the Secretary of State, in association with Washington’s 39 county elections departments, is working to ensure all voting age residents with disabilities have access to electronic voting machines that will allow them to vote as independently and secretly as the general population. Federal law requires the electronic voting machines, known as Disability Access Units (DAUs), to be available to voters 20 days before an election in at least one location in every county.

The DAUs feature large screens that enhance text size for the visually impaired. Each machine also includes headphones so that ballot proposals, instructions and candidate names can be heard by the voter, who then casts each vote by pushing a button. Other attached devices, such as a sip-and-puff, can assist voters who have severe hand and feet limitations. All machines are wheelchair accessible.

Voting on a DAU is secure. All voting equipment in Washington State is certified by the Office of the Secretary of State and has been tested at the federal, state, and county levels to ensure the equipment accurately records and reports the choices made by the voter. In addition, Washington State requires DAUs to provide a paper trail (similar to a paper ballot) that the voter can use to verify his or her vote. Additionally, the paper trail is used in post election audits to compare the results of the voting machines with a hand count of the paper votes.

If you have questions about using a DAU or want to know where a DAU is located in your county, contact your county elections department. Contact information for your county can be found in the back of this pamphlet.
The Ballot Measure Process

The Washington State Constitution affords voters two basic methods of direct legislative power — the initiative and the referendum. While differing in process, both initiatives and referenda have the same effect of leaving the ultimate authority to legislate in the hands of the people.

The Initiative

The initiative process is the direct power of the voters to enact new laws or change existing laws. It allows the electorate to petition to place proposed legislation on the ballot. The initiative’s only limitation is that it cannot be used to amend the state constitution.

There are two types of initiatives:

- **Initiatives to the People** - Initiatives to the people, if certified to have sufficient signatures, are submitted for a vote of the people at the next state General Election.

- **Initiatives to the Legislature** - Initiatives to the Legislature, if certified, are submitted to the Legislature at its regular session each January. Once submitted, the Legislature must take one of the following three actions:
  1) Adopt the initiative as proposed, in which case it becomes law without a vote of the people;
  2) Reject or refuse to act on the proposed initiative, in which case the initiative must be placed on the ballot at the next state General Election; or
  3) Approve an amended version of the proposed initiative, in which case both the amended version and the original version must be placed on the ballot at the next state General Election.

Any registered voter, acting individually or on behalf of an organization, may propose an initiative to create a new state law or to amend or repeal an existing statute.

To certify an initiative (to the people or to the Legislature), the sponsor must circulate the complete text of the proposal among voters and obtain a number of legal voter signatures equal to 8 percent of the number of votes cast for the office of Governor at the last regular gubernatorial election.

Initiative measures appearing on the ballot require a simple majority vote to become law (except for gambling or lottery measures which require 60 percent approval).

The Referendum

Washington’s referendum process is intended to give voters an opportunity to have the final say regarding laws either proposed or approved by the Legislature. The only acts that are exempt from the power of referendum are emergency laws — those that are necessary for the immediate preservation of the public peace, health or safety, and the support of state government and its existing institutions.

There are two referenda:

- **Referendum Bills** - Referendum bills are proposed laws referred to the electorate by the Legislature.

- **Referendum Measures** - Referendum measures are laws recently passed by the Legislature that are placed on the ballot because of petitions signed by voters.

Any registered voter, acting individually or on behalf of an organization, may demand, by petition, that a law passed by the Legislature be referred to a vote of the electorate prior to its going into effect (emergency legislation is exempt from the referendum process — see above).

To certify a referendum measure to the ballot, the sponsor must circulate among voters the text of the legislative act to be referred, and obtain a number of legal voter signatures equal to 4 percent of the number of votes cast for the office of Governor at the last regular gubernatorial election.

A referendum certified to the ballot must receive a simple majority vote to become law (except for gambling and lottery measures which require 60 percent approval).

Please Note: The preceding information is not intended as a substitute for the statutes governing the initiative and referendum processes, but rather should be read in conjunction with them. Relevant sections of law are found in Article 2, Section 1 of the Washington State Constitution and Chapter 29A.72 RCW. To access these sections online, visit the Code Reviser’s website at http://www1.leg.wa.gov/CodeReviser.
Official Ballot Title:

Initiative Measure No. 920 concerns estate tax.

This measure would repeal Washington’s state laws imposing tax, currently dedicated for the education legacy trust fund, on transfers of estates of persons dying on or after the effective date of this measure.

Should this measure be enacted into law?

Yes [ ] No [ ]

Note: The Official Ballot Title and Explanatory Statement were written by the Attorney General as required by law. The Fiscal Impact Statement was written by the Office of Financial Management. For more in-depth fiscal analysis, visit www.ofm.wa.gov/initiatives/default.htm. The complete text of Initiative Measure 920 begins on page 21.

Fiscal Impact Statement

Fiscal Impact Statement for Initiative 920

Beginning July 1, 2007, Initiative 920 would eliminate $184.5 million in revenue over the next two fiscal years by repealing the state estate tax. The state estate tax is dedicated to funding public schools (kindergarten through 12th grade) and higher education. The repeal would not affect revenue for this fiscal year, which began July 1, 2006 and ends June 30, 2007.

Assumptions for Fiscal Analysis of Initiative 920

• The initiative would repeal the estate tax for taxable estates of people who die on or after the effective date of the initiative, which is 30 days after November 7, 2006.

• Estates in Washington valued at more than $2 million currently pay a graduated rate ranging from 10 percent to 19 percent on the estate assets above the $2 million threshold. The value of property used primarily for farming can be deducted from the taxable estate.

• Taxable estates are not required to pay any estate tax until nine months from the date of death of the estate owner. Because of this delay, a repeal of the estate tax would not lower state revenues until the 2007-09 budget period. The revenues for public schools and higher education in the Education Legacy Trust Account would be reduced by a projected $184.5 million in the 2007-2009 budget period.

• The estate tax is deposited into the Education Legacy Trust Account. Funds in the Education Legacy Trust Account can be used only for class size reductions, extended learning opportunities and other public school improvement efforts adopted in Initiative 728; and for expanding access to higher education through new enrollments and financial aid; and other educational improvement efforts.
**Explanatory Statement**

**The law as it presently exists:**

Washington law currently imposes a tax on the transfer of an estate of a deceased person if the taxable value of the estate is at least 2 million dollars. The gross value of a deceased person’s estate includes the value at the time of death of all of the deceased person’s property, real or personal, tangible or intangible, wherever it is located. The taxable estate is determined by subtracting two million dollars, and various deduction amounts allowed under state law, from the gross value of the estate. The value of certain qualified property, as described in the law, such as farmland and timberland, may be deducted from the taxable value of the estate if the property is passed to a family member of the deceased person and certain other requirements are satisfied. Thus, such farmland and timberland generally are not subject to Washington’s estate tax.

The Washington estate tax is computed according to a table in the law. The tax rates and tax amounts specified in the table are graduated to increase with the value of the taxable estate. The minimum tax rate is ten percent for taxable estates of up to one million dollars, and the tax rate increases to a maximum of 19 percent on the portion of the taxable estate over nine million dollars.

The revenues from this estate tax, including penalties, interest, and fees, are deposited in the education legacy trust account. Money in the education legacy trust account may be used only for deposit into the student achievement fund, for expanding access to higher education, and other educational improvement efforts. The education legacy trust account is funded by the estate tax, a portion of the cigarette tax, and certain interest earnings on the account.

Washington’s estate tax is independent of any federal estate tax obligations, and is not affected by the payment of federal estate taxes.

**The effect of the proposed measure, if it becomes law:**

This measure would repeal Washington’s estate tax. The repeal would apply to the estates of persons dying on or after the effective date of the measure. The repeal would affect only the Washington estate tax. A deceased person’s estate would still be subject to federal laws imposing federal estate tax. Repeal of the Washington estate tax would discontinue that source of revenue for the education legacy trust account.
Statement For Initiative Measure 920

YOUNG PEOPLE HARDEST HIT BY A DEATH TAX ON THE FAMILY’S HARD-EARNED ASSETS

Young people look forward to an economically successful life. They don’t need another tax on their family’s hard-earned assets. Young people may think they will never face death taxes, but when a family member dies and a business or property must be sold in order for the government to take its cut, they realize what an unfair tax it is. The Death Tax reduces entrepreneurial endeavors that create jobs and expand capital formation. Death should not be a taxable event.

JOBS AND BUSINESS ARE ERODED BY ESTATE TAX (DEATH TAX) AND ALL CITIZENS AFFECTED

Entrepreneurship and jobs in the free enterprise system produce successful citizens and wealth. Small business owners create 97% of the jobs in Washington. Death taxes penalize savings, investment capital, business development and unjustly force the breakup of thousands of businesses and properties. Businesses and jobs disappear. Employers, employees, retirees and heirs all lose when death taxes force liquidation of assets.

SENIORS THRIVE ON SUCCESS OF THEIR CHILDREN (SUCCESS SHOULD BE REWARDED NOT PENALIZED)

Whether helping finance a car, home, real estate, or business, seniors thrive on helping their children and grandchildren. They want them to economically succeed. Individual entrepreneurial success should be rewarded and their hard-earned money should stay theirs to dispose of as they wish. Past revenue appraisers even appraised wedding rings. A grandparent’s or parent’s death should not trigger a tax and penalize heirs.

DEATH SHOULD NOT BE A TAXABLE EVENT—VOTE “YES” ON I-920

Washington voters abolished inheritance taxes in 1981, with Yes - 610,507 (67.24%), No - 297,445 (32.76%). This “new” Washington Estate Tax is separate from the federal estate tax resulting in survivors possibly paying nearly 70% in taxes. Death should not be a taxable event. Vote “Yes.”

For more information, visit www.NoEstateTax.org or call 253.565.1776.

Rebuttal of Statement Against

Repealing the estate tax will not reduce general funds for education. The estate tax burdens working family businesses that invest capital to create jobs in Washington. Traditionally, education funding comes from the general fund, is accountable to performance audits and legislative review. Funding, using government, to tax at death is a burden on the American family dream of prosperity, accumulating property and giving to your children and grandchildren. Death should not be a taxable event.

Voters’ Pamphlet Argument Prepared by:
DENNIS FALK, Chairman, Committee to Abolish Washington State Estate Tax; GENE E. LYNN, owner, Careage; CLAYTON R. JONES, Executive, Red Shield Insurance Company; LEE KEARNNEY, retired; MARCIA ATKINSON, writer; LINDA G. HANNA, retired.

Statement Against Initiative Measure 920

DON’T REPEAL FUNDS FOR PUBLIC EDUCATION

I-920 would gut a vital source of dedicated funding for education by repealing Washington’s estate tax. No one who’s not a multimillionaire pays the tax.

ONLY THE WEALTHIEST ESTATES PAY; FAMILY FARMS EXEMPT

The estate tax affects less than 1% of Washington’s families, applying only to estates worth more than $2 million for individuals and $4 million for couples. In fact, taxes are only charged on amounts above those thresholds. If a couple’s estate is worth $4,050,000, taxes are only 10% of $50,000.

Family farms are totally exempted, so farmers can freely pass their property on to their children.

A FAIR AND REASONABLE WAY TO GIVE BACK TO THE COMMUNITY

As it is, Washington’s working- and middle-class families already pay too much of the tax burden. The estate tax is a fair and reasonable way for the fortunate few to give something back. Repealing it will take $100 million away from public schools and penalize thousands of kids.

IT’S A MATTER OF PRIORITIES: MORE EDUCATION NOT MORE TAX BREAKS FOR MULTIMILLIONAIRES

Estate taxes by law go into the Education Legacy Trust Fund. The Fund is instrumental in the voter-mandated effort to help reduce K-12 class sizes, giving students more individual attention from teachers. Washington’s classes are among the nation’s largest and I-920 would frustrate efforts to reduce class sizes.

The Trust Fund also supports efforts to make higher education more affordable for students from working families.

It is far more important to support public education than to allow a few wealthy heirs to avoid paying their fair share. It’s a one-time payment from the very few and it means so much to thousands of kids. Vote no on I-920.

For more information, call 206.621.1042.

Rebuttal of Statement For

The few heirs affected by the estate tax are the wealthiest among us. Only estates over $2 million for individuals ($4 million for couples) pay any tax.

The most fortunate should give back something to the society that made their wealth possible.

99.5% of estates, including all family farms and most small businesses, pay no tax.

Enacting this measure would take $100 million from public education.

Vote no – no more tax breaks for multimillionaires!

Voters’ Pamphlet Argument Prepared by:
CHARLES HASSE, fourth-grade teacher, Washington Education Association President; WILLIAM H. GATES, author of Wealth and Our Commonwealth; KAREN GUZAK, Snohomish entrepreneur and small business owner; JOHN SENSENEY, third generation apple grower; PAMELA J. STEINBURG, middle school math teacher in Wenatchee; JAMES RUSHING, small business owner in Thurston County.

The Office of the Secretary of State is not authorized to edit statements, nor is it responsible for their contents.
INITIATIVE MEASURE 933
PROPOSED BY INITIATIVE PETITION

Official Ballot Title:

Initiative Measure No. 933 concerns government regulation of private property.
This measure would require compensation when government regulation damages the use or value of private property, would forbid regulations that prohibit existing legal uses of private property, and would provide exceptions or payments.
Should this measure be enacted into law?
Yes [ ] No [ ]

Note: The Official Ballot Title and Explanatory Statement were written by the Attorney General as required by law. The Fiscal Impact Statement was written by the Office of Financial Management. For more in-depth fiscal analysis, visit www.ofm.wa.gov/initiatives/default.htm. The complete text of Initiative Measure 933 begins on page 22.

Fiscal Impact Statement

Summary of Fiscal Impact
Initiative 933 is estimated to cost state agencies $2 billion to $2.18 billion over the next six years for compensation to property owners and administration of the measure. In the same time period, the Initiative is estimated to cost cities $3.8 billion to $5.3 billion, based upon number of land-use actions since 1996, and is estimated to cost counties $1.49 billion to $1.51 billion. Costs are derived from the requirement that, with specific exceptions, state agencies and local governments must pay compensation when taking actions that prohibit or restrict the use of real and certain personal property.

Assumptions Supporting Fiscal Impact Statement

• State and local governments would be required to document the impact of new rules or ordinances that may affect the use or value of private property prior to its adoption and evaluate less restrictive alternatives. State agencies estimate additional costs to the rule-making process of $24 million over six years. Based upon population it is estimated to cost cities between $80 and $103 million and counties between $28 and $36 million over six years.

• Claims for payments asserting that state or local rules and ordinances result in damage to use or value to property would be triggered when state and local governments deny or restrict private property owners who file permit applications with state or local governments to develop, harvest or otherwise make use of their property. Claims would also be triggered when a state or local government took an action to enforce an existing rule, ordinance or permit.

• According to state agencies, approximately 5,920 claims per year is estimated to be filed, and would likely be made for restrictions placed upon timber harvest, surface mining, activities occurring in rivers and streams to protect fish life, activities to preserve clean water, and activities involving the state’s shorelines. Claims processing is estimated to cost state agencies approximately $1.86 million over the next six years.

• Claims-processing costs for local governments from claims in local-land use, local-shoreline management plans and critical-area designations programs are assumed in the estimates for the additional analysis required for rule or ordinance adoption.

• State agencies would need to complete appraisals to verify compensation claims, resulting in a cost to state agencies of approximately $115 million over six years. The estimate is based on costs of $7,500 per appraisal for real property and $2,600 per timber cruise. Using similar appraisal costs, but assuming they would occur when there are appeals of decisions, the estimated cost to cities is between $130 and $556 million and to counties between $13 million and $66 million over six years.
• Under existing laws, appeals related to compensation levels would be filed in Superior Court. Between 5 percent to 20 percent of all claims (275-1,100) for state agencies is estimated to be appealed annually, increasing state agency litigation costs between $29.8 million and $98.8 million over the next six years. Using a standard cost per city based upon population, it is estimated to cost cities between $126 million and $161 million over six years and counties between $35 and $45 million over six years for litigation costs.

• Superior Courts and the Courts of Appeal will have additional costs resulting from claim decisions made by state agencies. The Office of the Administrator for the Courts estimates that these costs will be divided as follows: costs to the counties will be between $495,000 and $830,000 and the cost to the state will be between $82,000 and $328,000. Assuming a total of 5,000 appeals from state and local government action, there would be an additional $3.9 million in first year costs and $2.7 million in subsequent years.

• Assuming there are 5,920 claims per year, state agencies have estimated a range of compensation between $344 million and $352 million annually or $1.89 billion to $1.9 billion over six years. This estimate does not include compensation that may be required for restrictions placed upon 900 Hydraulic permits annually issued by the Department of Fish and Wildlife, which cannot be determined due to the highly site-specific requirements for these permits. Also not included are compensation estimates for timber-harvest restrictions occurring on unstable slopes or to protect marbled murrelet habitat; restrictions for Bald Eagle Site Management Plans occurring on nonresidential permits; and for setbacks to protect drinking water systems or setback and lot size requirements for onsite sewage systems required by the Department of Health.

• It is estimated to cost cities between $3.5 billion and $4.5 billion to pay compensation for actions that have occurred since 1996. The estimate is based upon a survey of cities on possible impacts, population growth rates, and assessed value.

• County governments planning under the Growth Management Act could see potential claim for compensation of approximately $1.4 billion over six years. This is based upon the potential compensation request for loss in value for acreage equivalent to that contained in the counties urban growth areas. No estimate is included for a loss in value for counties not planning under the Growth Management Act because of the inability to determine the number of acres in each county designated as critical areas such as geologic hazards, critical fish and wildlife habitats, wetlands, aquifer recharge areas or frequently flooded areas.

• These compensation estimates assume that state agencies and local governments will be unable to waive any current restrictions that may reduce the use or value of private property. It is also assumed that the state will not delegate back to the federal government federally delegated programs (i.e., Clean Water Act, Clean Air Act, etc.). No estimate has been made for any future actions taken by governments that may require compensation or for actions that attempt to reduce liability caused by the Initiative.

• The compensation estimates are also based primarily upon potential loss in value to real property. No estimate has been made for any potential loss to personal property.

• State law does not allow for the estimation of private costs or benefits from this or any other initiative.
The state and local governments enact and enforce laws that affect the use of real property, including laws that impose restrictions on use or development of real property. These laws are subject to constitutional and statutory requirements that provide certain protections to private property owners. Washington’s constitution requires state and local government to pay an owner of private property just compensation before taking or damaging private property for a public use, and in general prohibits government from taking private property for private use. The federal constitution provides similar protections. A common example of the requirement for just compensation occurs when government acquires private property to build a public road. The constitution requires government to pay fair market value for private property taken to build the road and for damages to private property used for the road building but not taken.

The constitutional requirement to pay just compensation also applies under limited circumstances to laws that restrict the use of private property. If the restriction completely eliminates the owner’s economic use of real property, or if the restriction involves a physical intrusion onto the private property, then just compensation is generally required. Whether regulations or restrictions on use of real property otherwise amount to a taking or damaging of private property under the constitution (and thus require payment of just compensation) depends on the particular effects on property. A restriction on real property may require just compensation depending on the economic impact of the restriction on the property, how the restriction affects legitimate property uses and the property owner’s reasonable investment-backed expectations, and whether the restriction reflects a reasonable means for achieving an important public objective.

Under the state and federal constitutions, a property owner may bring an action for just compensation to obtain the fair market value of property taken or damaged by the government, if the government has not paid compensation. Under the Washington Constitution, the property owner may also bring an action to invalidate government action that is taking or damaging private property and there is no public use, only a private use.

Under current state law, a property owner who has applied for a permit to use property may recover damages, attorney fees, and other costs where a state or local agency action on the permit application is arbitrary or capricious, or if the state or local agency does not act within time limits established by law. RCW 64.40. Under a variety of laws, a property owner may challenge state or local government restrictions on the use of property and obtain an agency review or judicial remedy if a restriction is not allowed under state or local laws. These statutory protections for property owners are in addition to the constitutional right to just compensation described above.

Under current state law, state agencies and local governments are required to follow an orderly and consistent process using advice and education from the Attorney General’s Office to evaluate proposed actions affecting the use of property and to avoid taking or damaging private property without just compensation. RCW 36.70A.370. The process applies to all state agencies and to those local governments that plan and regulate land uses under the Growth Management Act.

As described below, Initiative Measure 933 would require a government to consider and document certain factors prior to enacting laws regulating private property. The Measure would also require a government to pay compensation to private property owners to enforce restrictions “damaging the use or value” of private property as defined by the Measure, which would require compensation in circumstances in addition to those where the state or federal constitutions would require compensation. Development regulations could not prohibit legal uses existing on a parcel of property.

Initiative Measure 933 would require state and local government agencies to consider and document certain matters prior to enacting an ordinance, regulation, or rule that may “damage the use or value” of private property. “Private property” is defined to include all real and personal property interests protected by the state and federal constitutions, including and not limited to interests in land, buildings, crops, livestock, mineral and water rights. In general, “real property” refers to land, interests in land, and things attached to the land; “personal property” includes all other property. Government would be required to consider and document several factors, including: (1) identifying the private property to be affected by a proposed action; (2) the purpose(s) to be served by the action and the connection between the action and its purpose(s); (3) the extent to which the action deprives property owners of uses of property, or interferes with a property owner’s right to exclude others, to possess property, to enjoy property, or to dispose of property; (4) estimated compensation that would be required under the Measure for “damaging the use
The effect of the proposed measure, if it becomes law:

or value of property”; and (5) alternative less restrictive means of accomplishing the governmental purposes, including voluntary cooperation.

The Measure defines “damaging the use or value of property” as meaning “to prohibit or restrict the use of private property to obtain benefit to the public the cost of which in all fairness and justice should be borne by the public as a whole,” and includes examples of restrictions that would and would not result in “damaging the use or value” of private property, triggering the requirement for compensation.

Under Initiative Measure 933, examples of government action “damaging the use or value” of property and requiring compensation would include enforcement of any ordinance, regulation, or rule to private property:

- Prohibiting or restricting the use or size, scope, or intensity of any use legally existing or permitted as of January 1, 1996;
- Regulating the use of tidegates, bulkheads, or structures reasonably necessary to protect private property, the operation and maintenance of irrigation structures, or how a private property owner responds to flooding, erosion, or fire conditions;
- Requiring a portion of real property to be left in a natural state or with no beneficial use to the owner, unless necessary to prevent immediate harm to human health and safety; or
- Prohibiting maintenance or removal of trees or vegetation.

Initiative Measure 933 provides that enforcement of restrictions that apply equally to all property subject to a state or local agency’s jurisdiction would not “damage the use or value” of private property, and so would not require compensation. Under the Measure, examples include:

- Restricting the use of property to prevent immediate threat to human health or safety;
- Requiring compliance with structural standards like building or fire codes to prevent harm from natural disasters like fire, flood, or earthquake;
- Limiting location of sex offender housing or adult entertainment;
- Requiring compliance with federal laws restricting chemical uses, with worker health and safety laws, and with worker wage and hour laws;
- Requiring compliance with ordinances establishing setbacks from neighboring property lines, but only if the setbacks were set before January 1, 1996.

Under Initiative Measure 933, a local or state agency decided to enforce or apply an ordinance, regulation, or rule “damaging the use or value” of property, the agency must first pay the property owner compensation, and an agency that chooses not to take such an action is not liable for paying the property owner. Compensation would be the amount by which the fair market value of affected property is decreased by application or enforcement of the ordinance, regulation, or rule, and the fair market value of any portion of the property required to be left in a natural state or without beneficial use. Compensation also would include the property owner’s reasonable attorney fees to enforce compensation under the Measure.

Initiative Measure 933 would not limit existing state or local government authority to waive or vary the requirements of existing laws. The Measure would prohibit an agency from charging a fee to consider whether to waive or vary a law to avoid paying compensation that would be required under the Measure.

Initiative Measure 933 would amend current law to provide that “development regulations” could not prohibit uses legally existing on any parcel prior to their adoption. The term “development regulations” refers to controls placed on development or land use activities by a county or city such as zoning ordinances, critical areas ordinances, shoreline master programs, planned unit development ordinances, and subdivision ordinances.
Statement For Initiative Measure 933

Initiative 933, the Property Fairness Act, will restore balance between government’s power to regulate and the people’s constitutional right to own and use private property.

IT’S FAIR: PROTECTING THE USE OF PRIVATE PROPERTY PROTECTS OUR JOBS, RETIREMENTS AND PUBLIC SERVICES

In the past 10 years, excessive government regulations have violated our rights and made it difficult for farmers and other property owners to use their property in reasonable ways.

For most of us, our homes are our greatest investment. Government should not be able to change the rules and strip us of the use or value of our private property. I-933 protects our jobs, our economy and our retirement plans that depend on reasonable use of private property.

IT’S FAIR: I-933 REQUIRES GOVERNMENT TO CONSIDER COSTS AND RESPECT PROPERTY OWNERS’ RIGHTS

Too often, government adopts regulations without fully understanding the impact on the people it represents. I-933 will require government to identify the likely impact on property owners and pursue voluntary, cooperative efforts to achieve environmental goals before adopting new regulations.

IT’S FAIR: I-933 RETURNS RESPONSIBILITY FOR LAND-USE PLANNING TO LOCAL GOVERNMENT AND CITIZENS

Instead of accepting top-down mandates from unelected state officials, local government will be required to assess the impact of its actions on local property owners, thus giving citizens more say in local land-use decisions, and holding local officials accountable for their actions. Agencies can choose whether to compensate property owners or avoid damaging the use and value of private property. But the main point of I-933 is to have government avoid damaging property in the first place.

IT’S FAIR: I-933 REQUIRES GOVERNMENT TO RESPECT OUR RIGHTS AND FOLLOW THE CONSTITUTION

Washington’s state constitution says, “No private property shall be taken or damaged... without just compensation.” I-933 will force government to respect our rights and follow the constitution.

For more information, visit www.propertyfairness.com or call 360.528.2909.

Rebuttal of Statement Against

I-933’s opponents will say anything to maintain big government control of private property.

Their claims simply aren’t true. If local regulations prohibited development or activities 10 years ago, it will still be prohibited after I-933 passes.

However, if you prove government action damaged use or value of your property, government would compensate you or avoid causing damage.

I-933 forces government to consider costs and follow our state constitution by paying if regulations damage your property.

Voters’ Pamphlet Argument Prepared by:

STEVE APPEL, Endicott, wheat farmer, President of Washington Farm Bureau; SCOTTIE MARABLE, Bellevue, NFIB State Chair and small business owner; HEATHER HANSEN, Executive Director, Washington Friends of Farms and Forests; CLYDE BALLARD, Wenatchee, former Republican Speaker, House of Representatives; DAN WOOD, Montesano, former County Commissioner and Democratic Party Chair; DAVID TAYLOR, Yakima, land use consultant, former County Planning Director.

Statement Against Initiative Measure 933

A POORLY WRITTEN, LOOPHOLE-RIDDEN INITIATIVE THAT LEAVES HUNDREDS OF QUESTIONS UNANSWERED

Initiative 933 is deceptive and misleading. It provides no protection from eminent domain abuses. Instead, the special interests behind I-933 crafted loopholes that force Washington taxpayers to pay billions to a small group of property owners, or force communities to waive safeguards against irresponsible development.

WHO BENEFITS FROM I-933’S LOOPHOLES?

Here is an example of how the loopholes work. If laws prevent a property owner from expanding a strip mall in a neighborhood or building a subdivision on farmland, I-933 would force the community into a no-win choice—either waive the law or have taxpayers pay the property owner for not being able to build.

How will governments decide which laws to waive and who taxpayers pay? One thing is certain: I-933 is so poorly written it will generate endless lawsuits. Special interests will hire the best lawyers and win out over communities. The lawyers’ fees and administration alone will cost taxpayers millions.

Don’t be fooled – irresponsible development hurts farming. Hundreds of family farmers oppose I-933.

WHY WILL I-933 COST TAXPAYERS SO MUCH? AND WHERE WILL THE MONEY COME FROM?

In Oregon, a similar law generated almost $4 billion in claims against taxpayers. I-933 could cost each Washington taxpayer thousands yearly in additional taxes or lost services.

HOW WILL I-933 HARM SAFEGUARDS FOR OUR COMMUNITIES?

Communities have worked hard to protect their quality of life, but I-933 applies retroactively to laws going back at least 10 years! This would force communities to waive hundreds of existing safeguards we have depended on to protect neighborhoods and farmland, prevent water pollution, traffic and over-development.

I-933 is a costly assortment of loopholes, lawsuits, and special deals. Please vote no!

For more information, call 206.323.0520.

Rebuttal of Statement For

What’s fair about irresponsible development? Worse traffic? More taxes? Ask yourself who stands to gain from I-933’s loopholes.

Far from restoring balance, I-933’s loopholes allow irresponsible development to damage farmlands. That’s why farmers and farm-workers oppose it — including Western Washington Agricultural Association, Whatcom County Agricultural Preservation Committee, and United Farm Workers.

There’s nothing fair about thousands of dollars in new taxes each year, damaging our neighborhoods, and jeopardizing our quality of life. Vote no.

Initiative Measure No. 937 concerns energy resource use by certain electric utilities. This measure would require certain electric utilities with 25,000 or more customers to meet certain targets for energy conservation and use of renewable energy resources, as defined, including energy credits, or pay penalties.

Should this measure be enacted into law?

Yes [ ] No [ ]

**Note:** The Official Ballot Title and Explanatory Statement were written by the Attorney General as required by law. The Fiscal Impact Statement was written by the Office of Financial Management. For more in-depth fiscal analysis, visit www.ofm.wa.gov/initiatives/default.htm. The complete text of Initiative Measure 937 begins on page 23.

---

**Fiscal Impact Statement**

**Fiscal Impact Statement for Initiative 937**

Initiative 937 would cost state government $2.34 million in administrative costs over 14 years or an average of $167,000 per year. The offices of the Attorney General, Auditor, Utilities and Transportation Commission, and the departments of Community Trade and Economic Development, and Labor and Industries each would have a role in monitoring or assisting compliance. The initiative’s fiscal impact on Washington’s local governments cannot be determined due to variables ranging from future fuel costs to changes in demand for electricity. For the same reason, the impact of electricity costs for state and local governments cannot be determined.

**Assumptions for Fiscal Analysis of Initiative 937**

- The initiative requires the 17 largest electric utilities, which includes both public and private entities, in Washington to have 15 percent of their power supply generated from renewable resources by 2020; interim targets are also established. The utilities must also set and meet energy conservation targets starting in 2010.

- The Attorney General, State Auditor, Utilities and Transportation Commission, and the departments of Community Trade and Economic Development, and Labor and Industries each would require additional funds to implement the initiative. These funds would pay for: enforcement activity by state agencies to ensure resource targets were being met; rule making; legal advice; additional audits; and development of required apprenticeship programs for the renewable energy field.

- Local utility cost and revenue impacts are a function of fuel mix, load growth, and future fuel costs and cannot be estimated at this time.
Explanatory Statement

The law as it presently exists:

Electricity is supplied in Washington by both privately-owned companies (investor-owned utilities) and by publicly-owned utilities (utilities owned by cities, public utility districts, and certain other local government units). Some of these utilities operate their own facilities for generating electricity (typically hydroelectric dams or coal- or gas-fired generators). Some of these utilities purchase some or all of their electrical power from other utilities, from private producers or sellers of power, or from regional governmental entities such as the Bonneville Power Administration.

The state Utilities and Transportation Commission (UTC) regulates the rates and practices of investor-owned electric utilities serving customers in this state. Under existing law, the UTC is required to adopt and implement policies to provide financial incentives for energy efficiency programs, and may authorize utilities to issue conservation bonds for the construction, acquisition, and operation of conservation assets. Each investor-owned electric utility has conservation service tariffs that charge rates sufficient to recover from its customers the utility’s cost of conservation investment.

The UTC does not regulate publicly-owned electric utilities that serve customers in this state. These utilities are directly responsible to the voters in their service territories for their rates, services, and policies. Under existing law, cities operating electric utilities may issue bonds or otherwise borrow money for energy conservation purposes, and are required to develop conservation plans to assist the public in conserving energy. Public utility districts are subject to similar energy conservation planning requirements, and are also authorized to assist citizens by financing the acquisition and installation of materials and equipment for energy conservation purposes.

The effect of the proposed measure, if it becomes law:

Under existing law, electric utilities in this state are not obligated to meet any specific numeric targets for either energy conservation or use of renewable resources to produce power. The proposed measure would impose targets for energy conservation and use of eligible renewable resources on all electric utilities that serve more than 25,000 customers in this state.

Energy conservation. By January 1, 2010, each such electric utility would be required to identify its “achievable cost-effective conservation potential” through 2019, and to update this assessment at least every two years. “Conservation” would mean “reduction in electric power consumption resulting from increases in the efficiency of energy use, production or distribution.” Each utility would be required to set an annual target consisting of a certain share of this achievable cost-effective conservation potential, and to meet that share of conservation. In determining whether a utility meets its annual conservation target, the utility could include the reduction in electric energy sold to retail customers which own and use a high-efficiency cogeneration facility to meet some of their own power needs.

Renewable resources. Each utility would also be required to meet specific targets for using eligible renewable resources to produce electricity, stated as a percentage of the utility’s load. “Load” refers to the total amount of electricity the utility sold that year to its retail customers. Examples of eligible renewable resources include wind farms, solar panels, and geothermal plants. With limited exceptions, use of fresh water by hydroelectric dams and plants is not included as an eligible renewable resource.

Each utility would have to use renewable resources to serve at least three percent (3%) of its load by 2012 through 2015; nine percent (9%) of load by 2016 through 2019, and fifteen percent (15%) of load by 2020 and thereafter. A utility could comply with its annual renewable resource target by using the requisite amount of eligible renewable resources, by purchasing enough eligible renewable resource credits (or a combination of each), or by investing at least four percent (4%) of its total annual retail revenue requirement in renewable resources.

Cost recovery, penalties, reporting and enforcement. An investor-owned utility would be entitled to recover from its customers all costs the utility prudently incurred to comply with the measure. Similarly, each publicly-owned utility would be expected to recover its cost of compliance from its customers.

If a utility fails to comply with either the energy conservation or the renewable energy targets, it would have to pay a penalty in the amount of $50 for each megawatt-hour of shortfall. This penalty amount would be adjusted annually for inflation. Penalty payments would go into a special account, and could only be used for the purchase of renewable energy credits or for energy conservation projects at state and local government facilities or publicly-owned educational institutions.

In each year beginning in June 2012, each utility would be required to report to the state Department of Community, Trade, and Economic Development (CTED) on the utility’s progress in the preceding year in meeting the targets. The investor-owned utilities would supply the same information to the UTC. Each utility would be required to make these reports available to its customers.

The UTC would be authorized to implement and enforce the measure as to investor-owned utilities, and to adopt rules accordingly. For publicly-owned utilities, CTED would be authorized to adopt procedural rules and documentation requirements; the state auditor would be responsible for auditing compliance with the measure; and the Attorney General’s Office would be responsible for enforcement.

The Office of the Secretary of State is not authorized to edit statements, nor is it responsible for their contents.
I-937 PROVIDES A CLEANER, MORE AFFORDABLE ENERGY FUTURE

As Washington’s demand for energy grows, we can choose where we get our electricity.

We can either burn more fossil fuels like coal that pollute the air. Or we can use more clean, affordable renewable energy like wind and solar power – produced here in the Northwest.

I-937 is the cleaner, more affordable energy choice:

- 15% renewable energy. It requires the largest electric utilities to get 15% of their electricity from new renewable energy by 2020.
- Energy conservation. It requires utilities to help consumers and businesses save money through energy conservation.

I-937 SAVES ENERGY AND SAVES US MONEY

I-937 gives us cheaper, renewable alternatives like wind and solar. According to Puget Sound Energy, just two Washington wind farms are projected to save consumers $170 million. Renewable energy strengthens family farms by paying up to $5,000/year per wind turbine.

I-937 also saves money by requiring utilities to offer energy efficiency programs, like cash rebates for energy efficient appliances, home weatherization, and lighting, heating and cooling systems for businesses.

INITIATIVE 937 IS A COMMON SENSE, PROVEN APPROACH

I-937 is an approach that’s already working in 20 states. I-937 lets us take hold of our energy future and reduce our dependence on fossil fuels.

INITIATIVE 937 WILL GIVE US CLEANER AIR

Pollution from fossil fuels contributes to thousands of cases of lung disease and asthma each year. Renewable energy helps protect our families’ health by keeping our air clean.

Join the broad coalition including Union of Concerned Scientists, Washington Public Utility District Association, and Physicians for Social Responsibility choosing a clean energy future.

Vote yes! on I-937.

For more information, visit www.yeson937.org or call 206.283.3335.

Rebuttal of Statement Against

Don’t be misled by corporate polluters. I-937 opponents run the Washington Research Council; don’t trust its study.

I-937 will save us energy and money – through conservation and cheaper, cleaner energy.

Twenty states have adopted this approach, with proven cost savings – in just two years, Colorado consumers have saved $14 million.

I-937 protects consumers and reduces dependence on fossil fuels.

Yes on I-937! For cleaner air and more affordable energy.

Voters’ Pamphlet Argument Prepared by:

NINA CARTER, Executive Director, Audubon Washington; GREGORY REDDING, M.D., President-elect, American Lung Association of Washington and Idaho; BARBARA SEITLE, President, League of Women Voters of Washington; BOB POWERS, family farmers, Bickleton, Washington (Klickitat County); MICHAEL O’SULLIVAN, Government Relations, American Cancer Society, Great West Division; ART BOULTON, President, Washington State Alliance of Retired Americans.

I-937 WILL INCREASE ELECTRIC RATES AND UTILITY TAXES FOR HOMES AND BUSINESSES.

Alternative energy projects are being built now, but when required by law energy will be more costly for everyone. The non-partisan Washington Research Council estimates that I-937 will cost at least $185 million per year and could cost twice that much. Vote no on higher energy costs.

Alternative energy projects are heavily subsidized by a federal tax cut that ends next year. If it is not renewed by Congress, the cost for alternative energy could increase an extra 40%.

Higher energy costs put family-wage manufacturing and high-tech jobs at risk and hurt hospitals, family farms and small businesses.

Lower-income households and senior citizens on fixed incomes will be disproportionately impacted by higher energy bills.

I-937 DOES NOT TREAT LOW-COST HYDROPOWER AS “RENEWABLE ENERGY” WHILE OTHER STATES DO.

I-937 will cause low-cost hydropower to be sold to California while local utilities buy higher cost alternative energy for our homes and businesses.

FINES ON UTILITIES FOR NOT HAVING ENOUGH “RENEWABLE ENERGY” WILL BE PAID BY HOMES AND BUSINESSES.

Mandates and fines proposed by I-937 are not the way to promote alternative energy. We are paying too much for our energy bills now.

ALTERNATIVE ENERGY PROJECTS ONLY OPERATE SPORADICALLY AND MANY COMMUNITIES WON’T ALLOW THEM.

Wind and sunshine are irregular energy sources. Hydropower or thermal plants are needed to supply steady power for homes and businesses. But hydropower resources are being cut to protect fish and may not be available to supplement alternative energy.

I-937 does not require utilities to build alternative energy projects in Washington. Kittitas and Benton counties have rejected wind power proposals due to public opposition. Other states may financially benefit from these mandated projects, while we pay the cost.

Vote No and visit www.NOonI-937.com.

Rebuttal of Statement For

Puget Sound Energy and other utilities are already building wind projects, but only when they make economic sense. I-937 will make non-hydropower renewable energy even more expensive. The Northwest Power and Conservation Council reports the cost of new wind projects has “risen substantially,” because of mandates in other states.

There is nothing affordable about I-937. $185 to $370 million per year in additional energy costs to our households and businesses is too much. Vote no.

Voters’ Pamphlet Argument Prepared by:

DON BRUNELL, President, Association of Washington Business; KRISTINE M. MIKKELSEN, CEO, Inland Power and Light Company; LINDA LANHAM, Aerospace Futures Alliance of Washington; ROBERT HEMSLEY, former G.A. representative, Western Pulp/Paper Workers Association; DARRYLL OLSEN, Ph.D., board representative, Columbia Snake River Irrigators Association; JUDY COOVERT; small business co-owner, Printcom, Inc.
The legislature has proposed a constitutional amendment on increasing an exemption from the personal property tax.

This amendment would authorize the legislature to increase the personal property tax exemption for taxable personal property owned by each “head of a family” from three thousand ($3,000) to fifteen thousand ($15,000) dollars.

Should this constitutional amendment be:

Approved [ ]  Rejected [ ]

Votes cast by the 2006 Legislature on final passage:
Senate: Yeas, 46; Nays, 0.
House: Yeas, 96; Nays, 0.

Note: The Official Ballot Title and Explanatory Statement were written by the Attorney General as required by law. The complete text of House Joint Resolution 4223 begins on page 27.

The constitutional provision as it presently exists:

The state constitution and state statutes provide for a property tax based on the value of property. Property taxes apply to both real property (land, buildings, and permanent fixtures) and personal property (all other property that is not real estate). The amount of the tax is determined based upon the assessed valuation of the property. Certain personal property is exempt from tax, including household goods, furnishings and personal effects used by the owner, and most business merchandise. Personal property subject to property tax consists mainly of office furniture and business equipment, fixtures, and machinery.

The state constitution authorizes the legislature to enact an additional statutory exemption for taxable personal property worth up to $3,000 owned by each individual who is a “head of a family” and the legislature has done so. An individual who is a “head of a family,” as defined by statute, and by rule of the Department of Revenue, qualifies for the exemption. A “head of a family” is defined to include a husband or wife, or a surviving spouse not remarried; any person receiving an old age pension under state laws; any citizen of the United States, over the age of sixty-five who has resided in Washington continuously for ten years; and other individuals who reside with and provide care and maintenance for family members, as defined. Corporations, limited liability companies, and partnerships do not qualify for the exemption.

When an individual who qualifies as a “head of a family” owns taxable personal property, the individual is entitled to an exemption of up to $3,000.

The effect of the proposed amendment, if it is approved:

The proposed constitutional amendment would authorize the legislature to increase the maximum personal property tax exemption for taxable personal property owned by each “head of a family” from $3,000 to $15,000.
**Statement For HJR 4223**

Small businesses are the heart of Washington’s economy. Yet, the local businesses that provide good jobs for our families and communities often struggle to stay afloat.

This proposed constitutional amendment – HJR 4223 – will help local businesses grow and succeed.

Currently, businesses must pay a personal property tax on their assets. The first $3,000 of their assets are exempt from the tax. HJR 4223 would raise the exemption allowed under the State Constitution to $15,000.

Increasing the exemption will help businesses throughout Washington. Start up businesses, in-home businesses and businesses updating old equipment – such as computers or machinery – will benefit from this change.

This amendment will:

- Save money for Washington’s employers, enabling them to invest more in their workers and in improving competitiveness;
- Enable small businesses to upgrade their technologies without substantially increasing their tax burden;
- Reduce paperwork.

This reform is long overdue. While the cost of everyday items has increased significantly, this exemption has not been raised since 1988.

HJR 4223 was prime-sponsored by State Representative Derek Kilmer, who works with small businesses every day as a manager with the Economic Development Board in Pierce County. The proposal passed unanimously out of the State House and Senate.

It received the support of the Association of Washington Business, the National Federation of Independent Business, the Independent Business Association and local businesses throughout our state.

As citizens, we have the ability to pass this constitutional amendment and help our small businesses compete. Please vote “yes.”

**Statement Against HJR 4223**

State law requires that the argument and rebuttal statement against a constitutional amendment be written by one or more members of the state Legislature who voted against that proposed measure on final passage or, in the event that no such member of the Legislature consents to prepare the statement, by any other responsible individual or individuals to be appointed by the Speaker of the House of Representatives, the President of the State Senate, and the Secretary of State. No legislator who voted against House Joint Resolution 4223 or other individual opposing the measure consented to write an argument against the measure for publication in this pamphlet.

**Address Confidentiality Program**

If you are a victim of domestic violence, sexual assault or stalking who has chosen not to register to vote because you are afraid your perpetrator will track you down through voter registration records, the Office of the Secretary of State has a program that might be able to help you. The Address Confidentiality Program (ACP) works together with community domestic violence and sexual assault programs in an effort to keep crime victims safer. The ACP provides crime victims with a substitute mailing address that can be used when the victim conducts business with state or local government agencies. The ACP also provides participants with the option of confidential voter registration. All ACP participants must be referred to the program by a local domestic violence or sexual assault advocate who can help the victim develop a comprehensive safety plan.

**Need More Information?**

For more information about the ACP and the phone number of victim resources in your community, call the ACP toll-free at 1.800.822.1065, TDD/TTY at 1.800.664.9677 or visit www.secstate.wa.gov/acp .
AN ACT Relating to taxation; creating new sections; and repealing
RCW 83.100.010, 83.100.020, 83.100.040, 83.100.046, 83.100.047,

and 2005 c 516 s 10, 1997 c 157 s 6, 1996 c 149 s 14, 1988 c 64 s
12, & 1981 2nd ex.s. c 7 s 83.100.130;
(15) RCW 83.100.140 (Criminal acts relating to tax returns)
and 2005 c 516 s 11, 1988 c 64 s 13, & 1981 2nd ex.s. c 7

NEW SECTION. Sec. 3. This act applies to the estates of people
who die on or after the effective date of this act.

NEW SECTION. Sec. 4. The provisions of this act are to be
liberally construed to effectuate the intent and purpose of this act
favor of Washington state residents.

NEW SECTION. Sec. 5. If any provision of this act or its application
to any person or circumstance is held invalid, the remainder of the
act or the application of the provision to other persons or circumstances is not affected.

Please note
In the text of the measures, any language in double parentheses with a line through it is existing state
law and will be taken out of the law if the measure is
approved by voters. Any underlined language does
not appear in current state law but will be added to the
law if the measure is approved by voters.
AN ACT Relating to providing fairness in government regulation of property; adding new sections to chapter 64.40 RCW; adding a new section to chapter 36.70A RCW; and creating new sections.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF WASHINGTON:

INTENT TO REQUIRE FAIRNESS WHEN GOVERNMENT REGULATES PRIVATE PROPERTY

NEW SECTION. Sec. 1. This act is intended to protect the use and value of private property while providing for a healthy environment and ensuring that government agencies do not damage the use or value of private property, except if necessary to prevent threats to human health and safety. The people also intend to recognize and promote the unique interests, knowledge, and abilities private property owners have to protect the environment and land. To this end, government agencies must consider whether voluntary cooperation of property owners will meet the legitimate interests of the government instead of inflexible regulation of property.

The people find that over the last decade governmental restrictions on the use of property have increased substantially, creating hardships for many, and destroying reasonable expectations of being able to make reasonable beneficial use of property. Article I, section 16 of the state Constitution requires that government not take or damage property without first paying just compensation to the property owner. The people find that government entities should provide compensation for damage to property as provided in this act, but should also first evaluate whether the government’s decision that causes damage is necessary and in the public interest.

The people find that eminent domain is an extraordinary power in the hands of government and potentially subject to misuse. When government threatens to take or takes private property under eminent domain, it should not take property which is unnecessary for public use or is primarily for private use, nor should it take property for a longer period of time than is necessary.

Responsible fiscal management and fundamental principles of good government require that government decision makers evaluate carefully the effect of their administrative, regulatory, and legislative actions on constitutionally protected rights in property. Agencies should review their actions carefully to prevent unnecessary taking or damaging of private property. The purpose of this act is to assist governmental agencies in undertaking such reviews and in proposing, planning, and implementing actions with due regard for the constitutional protections of property and to reduce the risk of inadvertent burdens on the public in creating liability for the government or undue burdens on private parties.

FAIRNESS WHEN GOVERNMENT REGULATES PRIVATE PROPERTY BY REQUIRING CONSIDERATION OF IMPACTS BEFORE Taking ACTION

NEW SECTION. Sec. 2. A new section is added to chapter 64.40 RCW to read as follows:

(1) To avoid damaging the use or value of private property, prior to enacting or adopting any ordinance, regulation, or rule which may damage the use or value of private property, an agency must consider and document:
   (a) The private property that will be affected by the action;
   (b) The existence and extent of any legitimate governmental purpose for the action;
   (c) The existence and extent of any nexus or link between any legitimate government interest and the action;
   (d) The extent to which the regulation’s restrictions are proportional to any impact of a particular property on any legitimate government interest, in light of the impact of other properties on the same governmental interests;
   (e) The extent to which the action deprives property owners of economically viable uses of the property;
   (f) The extent to which the action derogates or takes away a fundamental attribute of property ownership, including, but not limited to, the right to exclude others, to possess, to beneficial use, to enjoyment, or to dispose of property;
   (g) The extent to which the action enhances or creates a publicly owned right in property;
   (h) Estimated compensation that may need to be paid under this act; and
   (i) Alternative means which are less restrictive on private property and which may accomplish the legitimate governmental purpose for the regulation, including, but not limited to, voluntary conservation or cooperative programs with willing property owners, or other nonregulatory actions.

(2) For purposes of this act, the following definitions apply:
   (a) “Private property” includes all real and personal property interests protected by the fifth amendment to the United States Constitution or Article I, section 16 of the state Constitution owned by a nongovernmental entity, including, but not limited to, any interest in land, buildings, crops, livestock, and mineral and water rights.
   (b) “Damaging the use or value” means to prohibit or restrict the use of private property to obtain benefit to the public the cost of which in all fairness and justice should be borne by the public as a whole, and includes, but is not limited to:
      (i) Prohibiting or restricting any use or size, scope, or intensity of any use legally existing or permitted as of January 1, 1996;
      (ii) Prohibiting the continued operation, maintenance, replacement, or repair of existing tidegates, bulkheads, revetments, or other infrastructure reasonably necessary for the protection of the use or value of private property;
      (iii) Prohibiting or restricting operations and maintenance of structures necessary for the operation of irrigation facilities, including, but not limited to, diversions, operation structures, canals, drainage ditches, flumes, or delivery systems;
      (iv) Prohibiting actions by a private property owner reasonably necessary to prevent or mitigate harm from fire, flooding, erosion, or other natural disasters or conditions that would impair the use or value of private property;
      (v) Requiring a portion of property to be left in its natural state or without beneficial use to its owner, unless necessary to prevent immediate harm to human health and safety; or
      (vi) Prohibiting maintenance or removal of trees or vegetation.
   (c) “Damaging the use or value” does not include restrictions that apply equally to all property subject to the agency’s jurisdiction, including:
      (i) Restricting the use of property when necessary to prevent an
An agency may not charge any fee for considering whether to read as follows:

The above text is an exact reproduction as submitted by the Sponsor. The Office of the Secretary of State has no editorial authority.
24

(1) “Attorney general” means the Washington state office of the attorney general.

(2) “Auditor” means: (a) The Washington state auditor’s office or its designee for qualifying utilities under its jurisdiction that are not investor-owned utilities; or (b) an independent auditor selected by a qualifying utility that is not under the jurisdiction of the state auditor and is not an investor-owned utility.

(3) “Commission” means the Washington state utilities and transportation commission.

(4) “Conservation” means any reduction in electric power consumption resulting from increases in the efficiency of energy use, production, or distribution.

(5) “Cost-effective” has the same meaning as defined in RCW 80.52.030.

(6) “Council” means the Washington state apprenticeship and training council within the department of labor and industries.

(7) “Customer” means a person or entity that purchases electricity for ultimate consumption and not for resale.

(8) “Department” means the department of community, trade, and economic development or its successor.

(9) “Distributed generation” means an eligible renewable resource where the generation facility or any integrated cluster of such facilities has a generating capacity of not more than five megawatts.

(10) “Eligible renewable resource” means:

(a) Electricity from a generation facility powered by a renewable resource other than fresh water that commences operation after March 31, 1999, where: (i) The facility is located in the Pacific Northwest; or (ii) the electricity from the facility is delivered into Washington state on a real-time basis without shaping, storage, or integration services; or

(b) Incremental electricity produced as a result of efficiency improvements completed after March 31, 1999, to hydroelectric generation projects owned by a qualifying utility and located in the Pacific Northwest or to hydroelectric generation in irrigation pipes and canals located in the Pacific Northwest, where the additional generation in either case does not result in new water diversions or impoundments.

(11) “Investor owned utility” has the same meaning as defined in RCW 19.29A.010.

(12) “Load” means the amount of kilowatt-hours of electricity delivered in the most recently completed year by a qualifying utility to its Washington retail customers.

(13) “Nonpower attributes” means all environmentally related characteristics, exclusive of energy, capacity reliability, and other electrical power service attributes, that are associated with the generation of electricity from a renewable resource, including but not limited to the facility’s fuel type, geographic location, vintage, qualification as an eligible renewable resource, and avoided emissions of pollutants to the air, soil, or water, and avoided emissions of carbon dioxide and other greenhouse gases.

(14) “Pacific Northwest” has the same meaning as defined for the Bonneville power administration in section 3 of the Pacific Northwest electric power planning and conservation act (94 Stat. 2698; 16 U.S.C. Sec. 839a).

(15) “Public facility” has the same meaning as defined in RCW 39.35C.010.

(16) “Qualifying utility” means an electric utility, as the term “electric utility” is defined in RCW 19.29A.010, that serves more than twenty-five thousand customers in the state of Washington. The number of customers served may be based on data reported by a utility in form 861, “annual electric utility report,” filed with the energy information administration, United States department of energy.

(17) “Renewable energy credit” means a tradable certificate of proof of at least one megawatt-hour of an eligible renewable resource where the generation facility is not powered by fresh water, the certificate includes all of the nonpower attributes associated with that one megawatt-hour of electricity, and the certificate is verified by a renewable energy credit tracking system selected by the department.

(18) “Renewable resource” means: (a) Water; (b) wind; (c) solar energy; (d) geothermal energy; (e) landfill gas; (f) wave, ocean, or tidal power; (g) gas from sewage treatment facilities; (h) biodiesel fuel as defined in RCW 82.29A.135 that is not derived from crops raised on land cleared from old growth or first-growth forests where the clearing occurred after the effective date of this section; and (i) biomass energy based on animal waste or solid organic fuels from wood, forest, or field residues, or dedicated energy crops that do not include (i) wood pieces that have been treated with chemical preservatives such as creosote, pentachlorophenol, or copper-chrome-arsenic; (ii) black liquor byproduct from paper production; (iii) wood from old growth forests; or (iv) municipal solid waste.

(19) “Rule” means rules adopted by an agency or other entity of Washington state government to carry out the intent and purposes of this chapter.

(20) “Year” means the twelve-month period commencing January 1st and ending December 31st.

NEW SECTION. Sec. 4. ENERGY CONSERVATION AND RENEWABLE ENERGY TARGETS. (1) Each qualifying utility shall pursue all available conservation that is cost-effective, reliable, and feasible.

(a) By January 1, 2010, using methodologies consistent with those used by the Pacific Northwest electric power and conservation planning council in its most recently published regional power plan, each qualifying utility shall identify its achievable cost-effective conservation potential through 2019. At least every two years thereafter, the qualifying utility shall review and update this assessment for the subsequent ten-year period.

(b) Beginning January 2010, each qualifying utility shall establish and make publicly available a biennial acquisition target for cost-effective conservation consistent with its identification of achievable opportunities in (a) of this subsection, and meet that target during the subsequent two-year period. At a minimum, each biennial target must be no lower than the qualifying utility’s pro rata share for that two-year period of its cost-effective conservation potential for the subsequent ten-year period.

(c) In meeting its conservation targets, a qualifying utility may count high-efficiency cogeneration owned and used by a retail electric customer to meet its own needs. High-efficiency cogeneration is the sequential production of electricity and useful thermal energy from a common fuel source, where, under normal operating conditions, the facility has a useful thermal energy output of no less than thirty-three percent of the total energy output. The reduction in...
load due to high-efficiency cogeneration shall be: (i) Calculated as the ratio of the fuel chargeable to power heat rate of the cogeneration facility compared to the heat rate on a new and clean basis of a best-commercially available technology combined-cycle natural gas-fired combustion turbine; and (ii) counted towards meeting the biennial conservation target in the same manner as other conservation savings.

(d) The commission may determine if a conservation program implemented by an investor-owned utility is cost-effective based on the commission's policies and practice.

(e) The commission may rely on its standard practice for review and approval of investor-owned utility conservation targets.

(2)(a) Each qualifying utility shall use eligible renewable resources or acquire equivalent renewable energy credits, or a combination of both, to meet the following annual targets:

(i) At least three percent of its load by January 1, 2012, and each year thereafter through December 31, 2015;

(ii) At least nine percent of its load by January 1, 2016, and each year thereafter through December 31, 2019; and

(iii) At least fifteen percent of its load by January 1, 2020, and each year thereafter.

(b) A qualifying utility may count distributed generation at double the facility’s electrical output if the utility: (i) Owns or has contracted for the distributed generation and the associated renewable energy credits; or (ii) has contracted to purchase the associated renewable energy credits.

(c) In meeting the annual targets in (a) of this subsection, a qualifying utility shall calculate its annual load based on the average of the utility’s load for the previous two years.

(d) A qualifying utility shall be considered in compliance with an annual target in (a) of this subsection if: (i) The utility’s weather-adjusted load for the previous three years on average did not increase over that time period; (ii) after the effective date of this section, the utility did not commence or renew ownership or incremental purchases of electricity from resources other than renewable resources other than on a daily spot price basis and the electricity is not offset by equivalent renewable energy credits; and (iii) the utility invested at least one percent of its total annual retail revenue requirement that year on eligible renewable resources, renewable energy credits, or a combination of both.

(e) The requirements of this section may be met for any given year with renewable energy credits produced during that year, the preceding year, or the subsequent year. Each renewable energy credit may be used only once to meet the requirements of this section.

(f) In complying with the targets established in (a) of this subsection, a qualifying utility may not count:

(i) Eligible renewable resources or distributed generation where the associated renewable energy credits are owned by a separate entity; or

(ii) Eligible renewable resources or renewable energy credits obtained for and used in an optional pricing program such as the program established in RCW 19.29A.090.

(g) Where fossil and combustible renewable resources are cofired in one generating unit located in the Pacific Northwest where the cofiring commenced after March 31, 1999, the unit shall be considered to produce eligible renewable resources in direct proportion to the percentage of the total heat value represented by the heat value of the renewable resources.

(h)(i) A qualifying utility that acquires an eligible renewable resource or renewable energy credit may count that acquisition at one and two-tenths times its base value:

(A) Where the eligible renewable resource comes from a facility that commenced operation after December 31, 2005; and

(B) Where the developer of the facility used apprenticeship programs approved by the council during facility construction.

(ii) The council shall establish minimum levels of labor hours to be met through apprenticeship programs to qualify for this extra credit.

(i) A qualifying utility shall be considered in compliance with an annual target in (a) of this subsection if events beyond the reasonable control of the utility that could not have been reasonably anticipated or ameliorated prevented it from meeting the renewable energy target. Such events include weather-related damage, mechanical failure, strikes, lockouts, and actions of a governmental authority that adversely affect the generation, transmission, or distribution of an eligible renewable resource under contract to a qualifying utility.

(3) Utilities that become qualifying utilities after December 31, 2006, shall meet the requirements in this section on a time frame comparable in length to that provided for qualifying utilities as of the effective date of this section.

NEW SECTION. Sec. 5. RESOURCE COSTS. (1)(a) A qualifying utility shall be considered in compliance with an annual target created in section 4(2) of this act for a given year if the utility invested four percent of its total annual retail revenue requirement on the incremental costs of eligible renewable resources, the cost of renewable energy credits, or a combination of both, but a utility may elect to invest more than this amount.

(b) The incremental cost of an eligible renewable resource is calculated as the difference between the levelized delivered cost of the eligible renewable resource, regardless of ownership, compared to the levelized delivered cost of an equivalent amount of reasonably available substitute resources that do not qualify as eligible renewable resources, where the resources being compared have the same contract length or facility life.

(2) An investor-owned utility is entitled to recover all prudently incurred costs associated with compliance with this chapter. The commission shall address cost recovery issues of qualifying utilities that are investor-owned utilities that serve both in Washington and in other states in complying with this chapter.

NEW SECTION. Sec. 6. ACCOUNTABILITY AND ENFORCEMENT. (1) Except as provided in subsection (2) of this section, a qualifying utility that fails to comply with the energy conservation or renewable energy targets established in section 4 of this act shall pay an administrative penalty to the state of Washington in the amount of fifty dollars for each megawatt-hour of shortfall. Beginning in 2007, this penalty shall be adjusted annually according to the rate of change of the inflation indicator, gross domestic product-implicit price deflator, as published by the bureau of economic analysis of the United States department of commerce or its successor.

(2) A qualifying utility that does not meet an annual renewable energy target established in section 4(2) of this act is exempt from
the administrative penalty in subsection (1) of this section for that year if the commission for investor-owned utilities or the auditor for all other qualifying utilities determines that the utility complied with section 4(2)(d) or (i) or 5(1) of this act.

(3) A qualifying utility must notify its retail electric customers in published form within three months of incurring a penalty regarding the size of the penalty and the reason it was incurred.

(4) The commission shall determine if an investor-owned utility may recover the cost of this administrative penalty in electric rates, and may consider providing positive incentives for an investor-owned utility to exceed the targets established in section 4 of this act.

(5) Administrative penalties collected under this chapter shall be deposited into the energy independence act special account which is hereby created. All receipts from administrative penalties collected under this chapter must be deposited into the account. Expenditures from the account may be used only for the purchase of renewable energy credits or for energy conservation projects at public facilities, local government facilities, community colleges, or state universities. The state shall own and retire any renewable energy credits purchased using moneys from the account. Only the director of general administration or the director’s designee may authorize expenditures from the account. The account is subject to allotment procedures under chapter 43.88 RCW, but an appropriation is not required for expenditures.

(6) For a qualifying utility that is an investor-owned utility, the commission shall determine compliance with the provisions of this chapter and assess penalties for noncompliance as provided in subsection (1) of this section.

(7) For qualifying utilities that are not investor-owned utilities, the auditor is responsible for auditing compliance with this chapter and rules adopted under this chapter that apply to those utilities and the attorney general is responsible for enforcing that compliance.

NEW SECTION. Sec. 7. Reporting and Public Disclosure. (1) On or before June 1, 2012, and annually thereafter, each qualifying utility shall report to the department on its progress in the preceding year in meeting the targets established in section 4 of this act, including expected electricity savings from the biennial conservation target, expenditures on conservation, actual electricity savings results, the utility’s annual load for the prior two years, the amount of megawatt-hours needed to meet the annual renewable energy target, the amount of megawatt-hours of each type of eligible renewable resource acquired, the type and amount of renewable energy credits acquired, and the percent of its total annual retail revenue requirement invested in the incremental cost of eligible renewable resources and the cost of renewable energy credits. For each year that a qualifying utility elects to demonstrate alternative compliance under section 4(2)(d) or (i) or 5(1) of this act, it must include in its annual report relevant data to demonstrate that it met the criteria in that section. A qualifying utility may submit its report to the department in conjunction with its annual obligations in chapter 19.29A RCW.

(2) A qualifying utility that is an investor-owned utility shall also report all information required in subsection (1) of this section to the commission, and all other qualifying utilities shall also make all information required in subsection (1) of this section available to the auditor.

(3) A qualifying utility shall also make reports required in this section available to its customers.

NEW SECTION. Sec. 8. Rule Making. (1) The commission may adopt rules to ensure the proper implementation and enforcement of this chapter as it applies to investor-owned utilities.

(2) The department shall adopt rules concerning only process, timelines, and documentation to ensure the proper implementation of this chapter as it applies to qualifying utilities that are not investor-owned utilities. Those rules include, but are not limited to, rules associated with a qualifying utility’s development of conservation targets under section 4(1) of this act; a qualifying utility’s decision to pursue alternative compliance in section 4(2)(d) or (i) or 5(1) of this act; and the format and content of reports required in section 7 of this act. Nothing in this subsection may be construed to restrict the rate-making authority of the commission or a qualifying utility as otherwise provided by law.

(3) The commission and department may coordinate in developing rules related to process, timelines, and documentation that are necessary for implementation of this chapter.

(4) Pursuant to the administrative procedure act, chapter 34.05 RCW, rules needed for the implementation of this chapter must be adopted by December 31, 2007. These rules may be revised as needed to carry out the intent and purposes of this chapter.

NEW SECTION. Sec. 9. Construction. The provisions of this chapter are to be liberally construed to effectuate the intent, policies, and purposes of this chapter.

NEW SECTION. Sec. 10. Severability. If any provision of this act or its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected.

NEW SECTION. Sec. 11. Short Title. This chapter may be known and cited as the energy independence act.

NEW SECTION. Sec. 12. Captions Not Law. Captions used in this chapter are not any part of the law.

NEW SECTION. Sec. 13. Sections 1 through 12 of this act constitute a new chapter in Title 19 RCW.
BE IT RESOLVED, BY THE SENATE AND HOUSE OF REPRESENTATIVES OF THE STATE OF WASHINGTON, IN LEGISLATIVE SESSION ASSEMBLED:

THAT, At the next general election to be held in this state the secretary of state shall submit to the qualified voters of the state for their approval and ratification, or rejection, an amendment to Article VII, section 1 of the Constitution of the state of Washington to read as follows:

Article VII, section 1. The power of taxation shall never be sus- pended, surrendered or contracted away. All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word “property” as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class: Provided, That the legislature may tax mines and mineral resources and lands devoted to reforestation by either a yield tax or an ad valorem tax at such rate as it may fix, or by both. Such property as the legislature may by general laws provide shall be exempt from taxation. Property of the United States and of the state, counties, school districts and other municipal corporations, and credits secured by property actually taxed in this state, not exceeding in value the value of such property, shall be exempt from taxation. The legislature shall have power, by appropriate legislation, to exempt personal property to the amount of ((three)) fifteen thousand (($15,000.00)) ($15,000.00) dollars for each head of a family liable to assessment and taxation under the provisions of the laws of this state of which the individual is the actual bona fide owner.

BE IT FURTHER RESOLVED, That the secretary of state shall cause notice of this constitutional amendment to be published at least four times during the four weeks next preceding the election in every legal newspaper in the state.
Maria Cantwell

Cantwell 2006
PO Box 12740
Seattle, WA 98111

Every day I’m working hard to put Washington first — keeping costs down for energy, health care, and education. I succeeded in toughening our privacy laws.

America needs a strong foreign policy, but it’s time for other countries, like Iraq, to provide their own security. U.S. troops should start coming home this year.

I helped build a Washington company and I know good-paying jobs require investments in education, job training, and new technologies. I have worked to open up more markets to our agricultural products.

With the help of federal financial aid, I was the first in my family to graduate from college. I know many families need help paying for the dream of a college education.

I stood up to Republicans and big oil companies to stop increased supertanker traffic in Puget Sound, fought and beat Enron when they tried to charge Washingtonians millions for energy they never delivered, and when President Bush tried to increase our energy rates almost forty percent, I joined with others and blocked the increase.

I’m fighting for our seniors by working to require drug companies to sell drugs at lower costs for Americans, stopping efforts to privatize Social Security and working for a better Medicare benefit that delivers real, affordable prescription drug coverage.

I passed a law to reduce our dependence on foreign oil by increasing our use of domestic biofuels. Just as with the aerospace and software industries, Washington can lead the way and get America off of fossil fuels, relying on our farmers and our domestic refiners.

I’m working to preserve our quality of life and stand up for our Northwest values. For me, the people of Washington state come first.

To learn more, please visit www.cantwell.com. I hope I can count on your vote.

Mike McGavick

Friends for Mike McGavick
PO Box 9247
Seattle, WA 98109

“The U.S. Senate is broken. They spend their time bickering, pointing fingers and fighting about who deserves credit for what little they accomplish. Their focus is on getting re-elected, not on solving the real problems facing our families and communities. Nothing will change if we just send the same people back to Washington, D.C. The Senate needs new leaders who will actually solve problems.” – Mike McGavick

Mike McGavick is exactly the proven problem solver we need. Born and raised in Washington, Mike is a father, husband and business leader. Mike worked in the Senate at a time when it actually produced results. As the CEO of Safeco, Mike brought people together and through hard work and personal responsibility, led Safeco back from the brink of bankruptcy, saving thousands of Northwest jobs.

Mike’s decisive leadership will produce results.

Deficit Spending. Out of control federal spending hurts every American. A consistent vote for higher taxes, the incumbent voted for more spending than any other Senator in the 108th Congress. Mike has a record of delivering better services more efficiently. He will make the hard choices to stop deficit spending.

Terrorism. America is still vulnerable to terrorist attack and the Senate has not done enough to protect us. Mike will vote to adopt the full set of 9/11 Commission recommendations for a safer America.

Border Security. Unsecured borders threaten our communities but the Senate doesn’t act. We must secure our borders while providing for an adequate workforce.

While the Senate is gridlocked by partisanship, our problems get worse. They have closed their minds and hearts. But it hasn’t always been this way. It’s time to send back a voice of Northwest common sense and civility, Mike McGavick, to focus again on solving the real problems facing our families and communities.
A Vision for America. I have a vision of a free and peaceful America that respects the rights of everyone. For years, the bi-partisan leadership in DC has taken us farther away from that vision. It’s time for new leadership and a fresh approach to politics. I’m committed to restoring the great American promise for this generation – and those to come.

A Policy of Peace. Americans are peace-loving people. Yet American military policy has jeopardized our peaceful relations with the rest of the world. We must begin the immediate, safe withdrawal of our troops from Iraq. We must reduce permanent US troop deployment around the globe. We must ensure that we have the best defensive military in the world by keeping it all-volunteer and treating our service members with dignity and respect.

A Culture of Freedom. America was founded on the understanding that society flourishes when individuals are free. Yet the current administration demonstrates a complete disregard for this basic principle. We must stop treating innocent Americans like criminals and end domestic spying programs. We must legally recognize an individual right to medical freedom. We must ensure that all individuals are given equal protection under the law.

A Legacy of Hope. I want to create a better world for our children and grandchildren while honoring those who sacrificed so much for our sake. We must protect future generations from runaway spending and reduce the deficit. We must reallocate resources to honor our obligations to seniors and veterans. We must restore faith in our democracy by ensuring fair and open elections, investigating and prosecuting corruption, and restoring the Constitutional checks and balances to our system.

Vote Your Values. If you share my vision of a free and peaceful America, I would be grateful for your support and your vote.

What is happening in Washington, DC is frightening. Party candidates will “follow” Parties which don’t know what is wrong. I am an independent: I have 40 years of community work, a family raised, and a degree in Political Philosophy and Economics at Claremont under Milton Friedman’s Chicago Group friend, Martin Diamond.

The economy is the most critical election issue!!

- The Economy: a hidden river of money: The Sub-Economy. Moving more money than Economy itself. Not measured. Paying few taxes. Unrecognized, totally man made (no plagues, asteroids...). Created by “bad” laws passed in Congress + Power to Tax = “imbalances.” [“imbalances” = “monopoly profits”; 2/3 government] Money in Circulation is money belonging to people and businesses: the “sucking noise” of money (Perot) is impoverishing Americans regressesivly. So much money removed that it has halted economic growth and created a “flat” economy. Money moves into less and less use = terrible inflation. More money is pumped from Circulation than goes in threatening implosion (“crash”). Much is dumped into Investments “glutting” markets, driving down earnings. And driving American investors “global,” with trade deficits and America “abandoned.” I have begun to write law to reverse the Sub-Economy: (1) Endowment Fund – making Social Security Profitable in seventeen years; using committed money (2) “People’s Insurance” (chartered stock companies) creating alternative parallel insurance offering cheap and full coverage; requiring “new” tools: spread risk, actuarial tables, assigned risk, and premium funds. Good Law!

- Privacy: Neither government nor business belong in our private lives.
- The Constitution it will take decades to restore.
- Global Weather earth into Ice Age 8000 years ago: didn’t get cold; no Ice Sheets. (Sci. Am. magazine 3.05). Aquifers didn’t fill: Drought Is Our Big Problem, and earth’s inability to “sweat” and cool itself.
Aaron Dixon for U.S. Senate  
PO Box 30046  
Seattle, WA 98113-0046

We’ve had enough of the politics of failure. We need to end the catastrophic wars in Iraq and around the world. Our continued military occupation provokes more violence and instability, costing lives and bringing grief to families here and in Iraq. This war costs $100,000 per minute—money that should be going to our health care, schools, neighborhoods, renewable energy and deteriorating infrastructure. I say bring the troops home now.

Trade agreements like NAFTA undermine industries and farms here, and decimate economies abroad. I will only support trade agreements that protect workers and the environment, and end welfare for wealthy corporations. I will fight for the rights of working people, native-born and immigrant alike.

Democrats and Republicans have surrendered to the politics of fear, twice passing a Patriot Act that has trampled our civil liberties. I will fight to repeal such legislation, and defend our Bill of Rights.

I’ll work for universal health care, affordable housing, living wage jobs, and comprehensive educational reform in our schools. I’ll be a leader on solving disastrous climate change. I’ll work to build the movements supporting a woman’s right to choose, marriage equality, and racial justice.

At 13, I marched with Martin Luther King, and later co-founded the Seattle Black Panther Party, which pioneered free breakfast programs, food banks, health and legal clinics. I’ve spent years working for nonprofits in our communities and, in 2002, founded Central House to work with disadvantaged youth. It is this legacy that I will bring to the U.S. Senate as the candidate of the Green Party of Washington State—a positive alternative to the corporate two-party system.

Out of War…and Into Our Communities.

Endorsed by Seattle School Board Directors Brita Butler-Wall and Sally Soriano, Olympia City Councilman T.J. Johnson and Garfield High School PTSA President Amy Hagopian.
I’m running for Congress because I am committed to serving the people of this district and building a stronger, brighter future for America. The values that guide me are honesty, hard work, and faith.

Born and raised in Pasco, I have lived in Central Washington all my life. Growing up I worked on the railroad, in potato sheds and orchards. My wife, Marilyn, and I have been married thirty years; we have six wonderful children. I believe in the sanctity of life and family.

My physical therapy practice started with one clinic in Moses Lake and has grown to twelve clinics in three states. I will bring a much needed twenty four years of small business and healthcare experience to Congress.

My top priority is to fight for affordable healthcare for all Americans, including fair Medicare drug coverage for our seniors and healthcare for our veterans to whom we owe so much.

Too many representatives in Congress cater only to lobbyists and big corporations; our elected officials forget who they represent. Special interest money will never buy my vote. I will always put the families and farmers of the 4th District first.

Economic security, family-wage jobs, and excellence in education must become realities. Through fiscal responsibility we can build a stronger economy.

The challenges our nation faces demand that we work together. Corruption and extreme partisanship keep our government in gridlock.

I will work everyday to restore cooperation, commonsense, ethics, and moral leadership to DC. I will reach across party lines to find common ground and will make decisions that serve you.

I am committed to these principles: True national security, including a clear strategy for Iraq; A stronger U.S. economy; Affordable healthcare for all.

It’s time for change. Stand with me. I ask for your vote!

It has been my honor and privilege to serve as your voice and advocate in the other Washington, working to restore common sense to policies that impact our lives and communities.

I’m proud of my record and of what we — working together — have been able to accomplish for Central Washington.

From working to protect agriculture, our natural resources and our way of life, to improving the quality of our schools and increasing access to affordable health care, there is no question our hard work is paying off. But there is still much to do.

We must protect our nation from terrorist threats, secure our borders and stop illegal immigration.

We must open new markets abroad, level the playing field for our farmers, and continue the research and other programs that give Central Washington farmers the tools they need to succeed.

We must continue policies that are creating jobs and growing our economy — which includes lowering the heavy tax burden on workers, families, and job-creating businesses.

We must ensure those who call Central Washington home have a meaningful role in managing our natural resources and low-cost power supply — so judges aren’t controlling our rivers and threatening our dams.

We must ensure our hospitals, doctors and health centers have the resources they need to provide hometown health care.

We must protect the future of Social Security and Medicare so today’s seniors and tomorrow’s retirees will have access to the health care and prescription drugs they need.

Your support has given me the opportunity to take the common sense values you and I share back to our Nation’s Capital. I’m asking for your vote so we can build upon the work we’ve started to ensure our children and grandchildren have the opportunity to enjoy a secure and prosperous future.
Peter J. Goldmark
Goldmark for Congress
PO Box 1512
Spokane, WA 99210

Peter Goldmark is a second-generation Okanogan rancher and small businessman. He is a father of five who has served as a WSU regent, school board member and Director of Agriculture.

Peter is running for Congress because politicians in Washington, DC don’t share our values. Peter will fight the special interests and deliver results for our families.

Peter will Take Care of our Armed Forces
Congress cut $1.8 billion in health care and veterans benefits—while giving themselves a raise. Peter supports our troops and honors those who sacrifice for our country. He will fight to restore benefits, increase military pay, and demand full body armor for our troops.

Peter will Protect Social Security
President Bush’s risky Social Security plan grabs 2 trillion dollars from Social Security, jeopardizing critical help for seniors. Peter knows we can’t afford to replace a guaranteed benefit with a guaranteed gamble.

Peter will Expand Affordable Health Care
As a rancher and businessman Peter works hard to provide healthcare for his employees and family. Peter will fight for families struggling to pay skyrocketing health care bills. Peter will take on the big drug and insurance companies to negotiate lower costs.

Peter will Secure Our Borders and Our Workforce
Peter supports Senator McCain’s comprehensive immigration reform. He’ll secure our borders and deal realistically with immigrants already working here.

Peter will Boost Our Economy
Peter will create jobs through growth in high tech, alternative energy, and biomedical research. He’ll increase farm program support and give farmers an energy credit.

Peter will Take on Big Oil to Lower Our Gas Prices
Congress has given billions to oil companies making record profits—while we pay record gas prices. Peter will stop unfair giveaways and impose stiff penalties for price gouging. He supports alternative energy production.

Peter Goldmark: Real Experience…Real Change.

Cathy McMorris
Cathy McMorris for Congress
PO Box 137
Spokane, WA 99210

Cathy McMorris understands that Eastern Washington is a special place. Her ancestors came to this region by wagon train and for five generations worked the land.

Since being elected to Congress in 2004, Cathy has worked in a bi-partisan fashion on issues important to Eastern Washington: creating jobs and growing our economy; improving access to quality, affordable health care; and keeping our communities and nation safe.

She has promoted economic growth by supporting lower taxes and less regulation and by funding key transportation projects and broadband to connect Eastern Washington. Recognizing the need for a well-trained workforce, Cathy sponsored and passed a bipartisan amendment to enhance American competitiveness in math and science education. To address our region’s health care needs, she introduced bi-partisan Health IT legislation and sponsored legislation to increase health care access in rural areas. And she has worked to save the dams and ensure an affordable, domestic energy supply.

Cathy serves on the Armed Services Committee where she focuses on protecting and expanding the mission at Fairchild AFB and protecting the veterans’ hospitals in Spokane and Walla Walla.

Cathy grew up working on the family farm and she understands what it takes to keep Eastern Washington’s billion dollar agriculture economy growing. In her first term in Congress, she co-sponsored emergency disaster assistance legislation, held Farm Forums to seek input for the 2007 Farm Bill, and voted to update and reform the Endangered Species Act.

Prior to coming to Congress, McMorris spent a decade in the Washington State House of Representatives. She served as Republican Leader and Chair of the Commerce and Labor Committee where she focused on competitiveness issues.

Cathy is married to Brian Rodgers. She earned a B.A. in Pre-Law from Pensacola Christian College and an executive MBA from the University of Washington.

Cathy McMorris: Real Experience…Real Change.
Jerome Delvin

Committee to Elect Jerome Delvin
PO Box 1113
Richland, WA 99352

Senator Jerome Delvin uses his experience and proven leadership abilities to best serve our community. Jerome represented our district as a State Representative for ten years. During that time he served as Assistant Republican Floor Leader, Assistant Majority Floor Leader, Chairperson on the Juvenile Justice committee and Vice-chair on Law and Justice. Other committee assignments included Higher Education, Agriculture and Ecology, and Telecommunications, Technology and Energy.

Jerome was appointed to his current senate seat in May 2004, winning the senate election later that year. His Senate committees have included Agriculture and Rural Economic Development, Early Learning K-12 and Higher Education, Water Energy Environment, and special committees that include the Gambling Commission and Life Science Board.

Jerome has been recognized for his accomplishments as both a Representative and a Senator. His priorities over the next legislative session will be to continue working on expansion of WSU Tri-Cities, promote cooperation between the state, WSU and PNNL through the Life Science Discovery Fund and balance a sustainable state budget.

As a lifelong resident of Benton County, Jerome knows the issues important to our area. Working with you, Jerome Delvin will continue to make a difference in Olympia.

State Representative
Eighth Legislative District

Shirley Hankins
Republican

In my 20 years serving the people of Benton County, my vision has always been focused on helping bring the highest quality education, building the finest transportation system, and encouraging strong economic development.

We are seeing the completion of a massive transportation improvement, which is leading to major economic growth. Our education system took a huge leap forward with our regional university – our children can go from K to Ph.D. locally.

Our growth and quality of life is dependent on all of us working together in united support. I’m proud to be part of this team.

Committee to Re-elect Larry Haler
PO Box 1319
Richland, WA 99352

Telephone: 509.308.1957
Website: www.larryhaler.com

Working closely with 8th District citizens and other elected officials, we made WSU-Tri-Cities a 4-year university, provided infrastructure funding at PNNL to keep their laboratories local, funded the Walter Clore Viticulture Center, built the WSU-TC Bioproducts building, funded the CBC/Richland Health Sciences Nursing Center, and provided low interest loans for city water and other infrastructure projects. These successes are a result of leadership, dedication and teamwork.

Thank you for the opportunity to serve as your state representative for two years. I will continue to work hard with the 8th District team to effectively represent your interests.

Caitlin Ross

Committee to Elect Caitlin Ross
10211 E. Connor Road
Valleyford, WA 99036

Caitlin Ross is an energetic woman who values the well being of the people in her district and across the state. She understands that the growth of wheat and other crops remains the backbone of Eastern Washington’s economy and plays a key role in its growth. Caitlin believes in providing a health care system where people in need are not turned away for any reason. Miss Ross also knows the importance of the role played by the region’s colleges, in both education and in agricultural research and will work to ensure that their programs and students are well represented.

Steve Hailey

Committee to Elect Steve Hailey
PO Box 283
Mesa, WA 99343

Steve Hailey - Proven Leadership for Eastern Washington. Steve will take local, state, and national leadership experience to Olympia. As a farmer, businessman, and decorated Viet Nam Veteran, Steve has worked for thirty years to protect the citizens of Eastern Washington on issues such as property rights, water rights, and land use. He will work for a better business environment; health insurance reform; better rail, river, and road systems; educational opportunities; and rural economic development to bring jobs to the 9th District. A fiscal conservative, Steve believes in giving 110% effort to represent you in Olympia. Vote for Steve Hailey.

David W. Buri

Committee to Elect David W. Buri
PO Box 171
Mead, WA 99025

It has been an honor to serve as your representative, reflecting on my first term there are several accomplishments I am most proud of: • 5 of my prime-sponsored bills became law. These bills helped small school districts and counties, got tougher on sex offenders, and eased burdensome licensing requirements for step-families; • Assisted family farms by co-sponsoring a bill eliminating tax on farm diesel; • Secured 10 million for WSU construction; • Selected to Leadership Deputy Whip; • 100% voting record from House floor.

I am optimistic about continuing to make positive changes for the future of our state.

Unopposed

State Senator
Fifteenth Legislative District

Tomás A. Villanueva
Democrat

Committee to Elect Tomás A. Villanueva
PO Box 1250
Toppenish, WA 98948

Tomás Villanueva has had a life-long commitment advocating for the well-being of our communities. His efforts helped create the first and largest medical clinic in the Northwest, currently known as the Yakima Valley Farm Workers Clinic. As President of the United Farm Workers of Washington State, Tomás put together a coalition that won coverage for farm workers under the state’s minimum wage, unemployment insurance, labor standards and child labor laws. As a member of the Washington State Farm Worker Housing Trust, Tomás has lobbied for millions of dollars for the construction of community based farm worker housing.

His top legislative priorities are ensuring affordable and accessible health care for individuals, their families and for small businesses; lowering the price of prescription drugs; investing in our children by adequately funding our schools; protecting our seniors from escalating heating and energy costs; and training our workforce and strengthening our community infrastructure to grow and attract more livable wage jobs.

Tomás has lived in the Yakima Valley for 48 years. He and his family live in Toppenish, Washington. A vote for Tomás Villanueva as our next Senator is a vote for a positive change to strengthen our families and our communities.

Jim Honeyford
Republican

Committee to Elect Jim Honeyford
PO Box 844
Sunnyside, WA 98944

Jim Honeyford asks to be returned to the State Senate. His experience on Ways and Means, Water, Energy and Environment, and Labor and Commerce Committees is vital to the people of the 15th District. In addition he serves as Caucus Chair and on many interim committees.

Jim Honeyford works hard for the people of his district. His personal and community focus has always been to plan ahead for positive growth. He promotes economic development so that jobs are available and cities and counties have the needed tax base. He works against waste in government and against regulations that dominate our lives. He believes State spending must be reined in so that budget deficits don’t become a burden on each family’s budget. He continues to work on resolving water issues for agricultural, industrial, municipal, and habitat uses with additional storage for a reliable, stable water supply. He pushes for a solution to the health care crisis and for improvements to our educational system to benefit our children. He believes our most vulnerable citizens—the elderly, the handicapped, and children—need special help. He enjoys helping and hearing from all his constituents.

Jim and his wife, Jerri, live north of Sunnyside.

The above statements are an exact reproduction of those submitted by the candidates. The Office of the Secretary of State has no editorial authority.
Glen Howard Pinkham  Democrat

Friends for Glen Pinkham
PO Box 269
Wapato, WA 98951-0269

My name is Glen Pinkham, a 1979 Toppenish High School graduate, 1985 graduate of Yakima Valley Community College, married 21 years with three children. My wife and son attend the University of Washington with my two youngest attending Roosevelt High School. I’m currently on Wapato City Council, former Yakama Nation Tribal Council. As community resource coordinator, I ran my own sports camps highlighting the Yakama Sunkings, YVCC, CWU, and Gonzaga. My platform is “to build strong families.” I believe in creating a robust economy, livable wage, adequate housing, increasing dollars for education, fair/accessible health care emphasizing lowering pharmaceutical costs.

Bruce Chandler  Republican

Bruce Chandler Campaign
PO Box 1108
Zillah, WA 98953

Representing the people of the 15th District, I have fought to restrain the costs of state government and make it more accountable. I have worked to ease regulations so agriculture and small businesses can succeed and provide jobs in our communities. I have worked to keep our neighborhoods safe and hold criminals fully accountable for their actions.

Government actions dramatically shape our lives. A strong economy, good jobs and healthy communities require common sense government. It’s essential voters elect legislators committed to protecting our quality of life and allowing Washington’s families a better future. Please vote for Bruce Chandler.

William J. Yallup  Democrat

Elect William J. Yallup
PO Box 1036
Toppenish, WA 98948

Greetings to you the voters of the fifteenth legislative district. I want to begin with thanking you for your nomination to be your candidate in this election.

Why did I accept this nomination? For several reasons, my respect for the sacrifices made so we can build on the future, the generation of wealth for all citizens and the care for our senior citizens. I believe that a nation is judged on its ability to care for the youth and the elderly. Thank you, my name is William J. Yallup.

Dan Newhouse  Republican

Dan Newhouse Campaign
PO Box 1214
Sunnyside, WA 98944

Dan Newhouse was born in the Yakima Valley, graduated from WSU, is past president of Yakima County Farm Bureau and Hop Growers of America. He and his family live on their farm near Sunnyside. His agriculture and business knowledge, his ability to listen, work with people, and his integrity have served our district well.

Dan believes government must be efficient with your tax dollars. He supports issues that will provide safe neighborhoods, job opportunities, and protect property rights. With your vote, Dan will continue to promote education, business, agriculture, timber, and an adequate water supply for all. Thank you.

Tom Chambers

Committee to Re-elect Justice Tom Chambers
PO Box 21954
Seattle, WA 98111-3954

Raised behind his parent’s gas station in Eastern Washington, Tom learned his work ethic and core values. In six years on the Supreme Court he has built a powerful record protecting the rights of working people, property owners, and crime victims. Justice Chambers defends the constitution, our individual liberties, and our property rights.

Committed to serving others, one of the most respected judges in the state, he was awarded the 2006 Outstanding Judge of the Year Award by King County Washington Women Lawyers for his dedication, understanding, and fairness. A past president of the Washington State Bar Association, he has earned the King County Bar Association’s highest rating, “Exceptionally Well Qualified.”

Justice Chambers is an honest, principled, and independent voice on our Supreme Court.

The Washington State Troopers Association wrote, “The citizens of Washington State are fortunate to have an individual of your caliber in such an important and critical position. Be assured that our members stand solidly in support of your reelection.” Widely endorsed by law enforcement, fire fighters, Republicans, Democrats, Libertarians, prosecutors, business groups (Building Industry Assoc. of Washington), labor unions (State Labor Council), Conservation Voters, and more than 150 current and former judges. Visit www.tomchambers.com.

Unopposed

Gerry L. Alexander

Committee to Re-elect Justice Gerry Alexander
525 Columbia Street N.W., #202
Olympia, WA 98501-1098

Elected to the Supreme Court in 1994, Chief Justice Gerry Alexander’s judicial experience is unequalled. The only current justice to serve at three court levels, his service includes 10 years on the Court of Appeals and 11 years on the Superior Court of Thurston and Mason Counties. His opponent has no service on the bench.

Rated “exceptionally well qualified” by the King County Bar Association, Chief Justice Alexander is a judicial leader. His accomplishments include opening all Supreme Court sessions to television, holding court sessions in locations around the state for greater public visibility, opening access to court records, working for an increase in the fee paid to jurors, and advocating for limits on campaign contributions to judicial candidates.

He is endorsed by a wide range of groups interested in a competent and impartial Supreme Court, including: Washington Democratic Party; Mainstream Republicans; Association of Washington Business; Washington Conservation Voters; Washington State Labor Council; Washington Education Association; and former Governors Dan Evans, Booth Gardner, John Spellman.

Before his election to the bench, Chief Justice Alexander practiced law in Olympia. He earned his law and undergraduate degrees at the University of Washington and served as an infantry lieutenant in the U.S. Army.

Unopposed

The above statements are an exact reproduction of those submitted by the candidates. The Office of the Secretary of State has no editorial authority.
Legal judicial experience:
Judge Kulik came to the Court of Appeals with 27 years experience as a lawyer primarily in Yakima, Kittitas, and Chelan counties. Beginning her career with Evergreen Legal Services, she then served as an Assistant Attorney General in Yakima and Wenatchee under Attorneys General Ken Eikenberry, Christine Gregoire, and Rob McKenna. She supervised seven regional offices, litigated cases in nine eastern Washington counties, and was counsel to Central Washington University for 21 years. She received the Outstanding Leader and Steward of Justice awards. In 1994, she was elected President of the Yakima County Bar Association.

Candidate statement –
I pledge to be fair and impartial and to honor the trust placed in me as a judge. I will steadfastly adhere to our nation’s promise of equal justice under the law.

Former Attorney General Ken Eikenberry and Attorney General Rob McKenna supported my appointment as judge by Governor Gregoire. Mr. McKenna stated that I am an “excellent lawyer with great integrity and a tremendous work ethic.” I bring those qualities to the court.

I was born and raised in Yakima and reside in Wenatchee. I was married to the late Peter G. Young, and have one adult son.
